

SOFTWARE HOSTING

Health information technology is transforming the practice and business of medicine. It's a powerful way to boost productivity and efficiency. It's also demanded by new government reimbursement regulations and incentive programs. Here's the rub: software is expensive, can be costly to maintain, and doesn't deliver much value in the hands of poorly trained users. Who wants that?

One way to implement and maintain essential practice management software is to have MedOptima host it for you. Not only does this give you access to state-of-the-art software at a fraction of the cost, you also receive all of the benefits of the software itself plus training and process engineering to maximize all the benefits the software has to offer.

With MedOptima as your software-hosting partner, we will help make your practice more efficient, streamline reporting and compliance, and help you qualify for government incentive programs such as the Physician Quality Reporting Initiative (PQRI), e-Prescribe and the federal HITECH Act. We make adopting health information technology easy in these ways:

- We select, vet, and offer for your use only proven software solutions, minimizing your risk.
- We host the software so that you enjoy the advantages of its use, without the heavy investment in hardware and software.
- We manage software upgrades and issues, so you can focus on your clinical practice.
- We are continuously identifying and adding new information technology solutions to drive the operating efficiency and profitability of your practice.
- We are experts in the software we provide, and we train your staff on how to use the software for maximum efficiency and effectiveness.

MedOptima is not a traditional billing company. We optimize practice performance so you enjoy more revenue, faster payment times, fewer payment hassles, and enhanced compliance.

MedOptima software hosting is a solution that starts with a conversation. **Let's talk.**
